

Ronen Lebi

Chief Business Officer

Ronen Lebi is the Chief Business Officer at Machina Labs, where he leads strategy, sales, marketing, operations, and partnerships. Since joining the company in August 2024, Ronen has focused on accelerating the adoption of Machina's AI-enabled robotic manufacturing platform across defense, aerospace, and industrial markets.

Ronen brings over 15 years of experience building and scaling technology ventures at the intersection of advanced manufacturing, AI, and robotics. Prior to Machina Labs, he held multiple senior leadership roles at Stratasys, the world's largest additive manufacturing company. As Vice President and Head of Stratasys Dental, he launched a global business unit and go-to-market strategy that drove 35% year-over-year growth and tripled revenue from new customer accounts. Previously, he led the P3 Business Unit, deploying next-gen manufacturing systems to Fortune 500 aerospace and automotive customers, generating over \$20 million in revenue in the first year.

Earlier in his tenure at Stratasys, Ronen served as Vice President of Corporate Development, where he led inorganic growth initiatives exceeding \$300 million. His efforts spanned M&A, investments, and joint ventures in emerging technologies, including metals, composites, and polymers.

Ronen began his career in management consulting and investment banking and was one of the early employees at Waze, where he led the QA team responsible for building the platform's global mapping infrastructure.

He holds a bachelor's degree in agricultural economics from the Hebrew University of Jerusalem and dual MBAs from the Interdisciplinary Center in Israel and the Wharton School of the University of Pennsylvania. Raised and educated across Israel, the UK, the Netherlands, and the U.S., Ronen brings a global perspective and cross-cultural leadership to every venture.
